A QUESTION OF VERACITY.

In his speech at the trial of John H. Surtall, Mr. Parpont presented a paper purporting to be the original recommendation of Mrs. Sarralt to the executive elementy which was laid before the President with the rather papers containing the result of the trial of the assassins of Mr. Lincoln. President dolur on has since caused to be pub-Eshed a denial of his ever having seen the document until long after the execution of the prisoners. Mr. Pierpont afterwards made the following statement in court:

is a part of the original record which I have produced. It is in the handwriting of one of the members of that count to wit, General Ekin. The original of that is now in his posits shot, and in the handwriting of Hom. John A. Bingham. When the counseleadled for that record, I sent the afternoon of that day to the Judge Advocate General, in whose possession these records are. He brought it to me with his own hand said told me with his own lips, in the presence of three other gentlemen, that that identical and retained then that a part of the record, was before paper, then a part of the record, was before the President when he signed the warrant of exceeding, and that he had a conversation with the President at that time on the sub-Sect. That is my authority. Subsequent to this, having pressed it here, the Judge-Advocate-General called to receive it shack, and relicional in the presence of other gen-thenen, the same thing. This is my bloow Jodge, and that is my authority.

The question now arises whether Mc. Johnson or Judge Advocate Holt states, the real facts in the case.

Aggroes After Election,

Stremmas efforts have been made at the South to reavince the negroes that their last interests and those of the Southern "Constitutive" tickets and avoiding all political connection with the "Ra licals," The former were asserted to be the real friends of the freedmen, and the latter were hald to fevor measures, which would result in the greatest evils to their race. At the election in Tennessee, the great

in dority of the Union party shows that near-In all the necroes voted on that side. They are not so destitute of the reasoning faculty as their fermer masters appear to have supposed thera. Yet, it requires left a short argument for them to decide the question of friendship between the party that has given them their freedom and the hight to yote. and the party first used every effort to keep them in bondage and, after they were made free against all this opposition, placed every obstacle in the way to their enfranchisement and menhadd. They could not be allered to the support of this party by all the inducements that were laid before them.

The proofs in the case are now coming to light in the discharge, from the employment of Conservatives, of bundreds of negro ta bon is. The streets of the cities are Guerger with idle people who are thrown out of the employments by which they have supported fictuselyes and their families, simply because they voted for the Republican candi-

Throughout the South a similar condition of things may be unticipated, unless politticians are wiser elsewhere than they are in Tenut-see. Doubtless, the negroes everywhere take the same view of the subject and will you also st unanimously on the same side. It may be, this is the sense in which the negroes were to be injured by voting for the Republicans; but no very extensive body of politicians can be so short-sighted as not to see that such a course rule: their own prospects with this large class of voters-Such a process cannot bring the proscribed class to their support, but must tend to alignate them still more, and to throw the obstructionists into a still smaller minority, which fact will hasten the reconstruction
